DETAILED ACTION

This is the first office action in response to the above identified patent application filed on 04/09/2004.

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species: I) the species of Figures 1-11; II) the species of Figure 12; III) the species of Figure 13; IV) the species of Figures 14, 14a; V) the species of Figure 15; VI) the species of Figure 16; VII) the species of Figures 18-19a; VIII) the species of Figures 19b; IX) the species of Figure 19c. The species are independent or distinct because: the particular of specie is not necessary for the patentability of another specie (i.e., a nozzle having a beveled edge; a nozzle having non-linear edged; a nozzle having curved outer edge surfaces; etc).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
